IMSAFE 5-in-1 Multipurpose Tool

-  Hammer to break glass surfaces
-  Cutter for seat belts, wires, ropes, etc.
-  LED torch
-  Beeper to raise alarm
-  Emergency beacon light
-  Magnet to hold emergency tool on any metal surface

IMSAFE 5-in-1 Multipurpose Tool is an all-rounder in itself with varied uses. It can act as an LED Torch Light in case of any fire emergency as well as can beep loud enough to raise an alarm to seek external help. Its multi-purpose usage can also be determined from the fact that it can simultaneously cut wire or rope and can break glass in case of an emergency. It is weather-resistant and light in weight.

IMSAFE Fire Thread

Ultra safety for the
fire seita products

- ☒ Easy to install - Can be DIY (do it yourself)
- ☒ Once the fire comes in contact with the thread it combusts emission of gas from the thread tube
- ☒ The gas ensures fire is extinguished
- ☒ The gas causes least damage to the area affected by the fire
- ☒ Can be customized according to the requirement of the client
- ☒ Easy to transport, install and use
- ☒ Size can be customised as per requirement

IMSAFE Fire Thread is easy to install and can be conveniently set up as a DIY (do-it-yourself) solution. When fire comes in contact with the thread, it triggers combustion, leading to the emission of gas from the thread tube. This gas effectively extinguishes the fire while causing minimal damage to the affected area.

IMSAFE

Fire Sticker

- ☒ Prepare the surface for installation of the product. Clean the surface from dust and dirt, degrease with the alcohol cloth
- ☒ Carefully remove the protective film from the adhesive layer of the product
- ☒ Firmly press the product with the adhesive layer to the prepared surface and hold for a few seconds
- ☒ No external electricity required
- ☒ Self detection and self release of extinguishing agent
- ☒ Working temperature "-10°C TO 60°C
- ☒ Activation temperature "100°C ± 10°C"
- ☒ Size can be customised as per requirement

To install the **IMSAFE Fire Sticker**, first prepare the surface by cleaning it thoroughly from dust and dirt, then degrease it with an alcohol cloth. Carefully remove the protective film from the adhesive layer and firmly press the product onto the prepared surface, holding it in place for a few seconds to ensure proper adhesion.
